

Presbytery of Lake Erie
Energy Efficiency Grant Application

We live in an energy efficient age. The Presbytery of Lake Erie partners with churches as they seek to be good stewards of their financial resources in the arena of energy efficiency. Matching grants, up to \$500, are made to churches by the Congregational Life Committee for energy efficiency efforts undertaken on their church building. A congregation can apply only once per calendar year.

Application Process:

Submit the paid bill for the work which has already been completed. The Congregational Life Committee will review the application to ensure that it relates to energy efficiency. For further information contact the presbytery office.
